issues related to reverse network configuration, forward and reverse supply chain integration, CO2 reduction in transportation, improvement of the production operations and management of the recovery activities. Some best practices from different countries and industries are presented. This book will be valuable to both academics and practitioners wishing to deepen their knowledge in the field of logistics operations and management with regard to sustainability issues.

Given the rapid growth of computer-mediated communication, there is an ever-broadening range of social interactions. With conversation as the bedrock on which social interactions are built, there is growing recognition of the important role conversation has in instruction, particularly in the design and development of technologically advanced educational environments. The Handbook of Conversation Design for Instructional Applications presents key perspectives on the evolving area of conversation design, bringing together a multidisciplinary body of work focused on the study of conversation and conversation design practices to inform instructional applications. Offering multimodal instructional designers and developers authoritative content on the cutting-edge issues and challenges in conversation design, this book is a must-have for reference library collections worldwide.

beta, and gamma decay. Many tasks that include the radiation doses. The book uses many of concepts such as: binding energy, kinetic energy and radius of nuclei, wavelength of the particle such as electron, proton and neutron. There are tasks about the density of nuclear material, heat equilibrium and collision, which occur between these particles and nuclei of the target, produce by these collision two types of scattering, they are elastic and inelastic scattering of the particle. The angle of the scattering plays an important role in the calculation of kinetic energy and momentum. The book also includes appendix with tables of physical constants related to these tasks. This is includes a table of radioactive isotopes. Student can be used this book to help him to develop his acknowledge of the many topics related to nuclear energy in general, and especially nuclear physics.

This book constitutes revised selected papers from the 14th International Global Sourcing Workshop 2019, held in Oberurgl, Austria, in December 2019. framework. It integrates the topics of knowledge management, total quality management, and relationship marketing with the goal of explaining the benefits of CRM for internationally active firms. The authors have included six case studies which allow the reader to undertake the role of CRM consultant in a 'learning by doing' approach. The book should be required reading for all business executives who desire a customer-oriented approach to success, and for all students of business who desire to gain insight into a relationship management approach which will become ever-more important in the years ahead.

Non-profit Organizations (NPOs) are the fastest growing organizations in modern society. They exist in a liminal realm between public and private organizations, and because of this, new jurisdictions are created for NPOs. The existence of NPOs is contingent upon their adequacy, and management is a key determining factor as to whether an organization survives. The Handbook of Research on Managerial Solutions in Non-Profit Organizations provides relevant theoretical frameworks and the latest empirical research findings related to the successful management of nonprofits. Providing insights into the best practices and valuable comparisons between strategies in different contexts, this book gives invaluable support for nonprofit managers, policy makers, students, and researchers. This book constitutes revised selected papers from the 14th Conference on Advanced Information Technologies for Management, AITM 2016, and the 11th Conference on Information Systems Management, ISM 2016, held as part of the

Federated Conference on Computer Science and Information Systems, FedCSIS, which took place in Gdansk, Poland, in September 2016. The 13 papers presented in this volume were carefully reviewed and selected from 51 submissions. They were organized in topical sections named: information technology and systems for knowledge management; information technology and systems for business transformation; and implementation and evaluation of information systems.

The Present Book Differential Equations Provides A Detailed Account Of The Equations Of First Order And The First Degree, Singular Solutions And Orthogonal Trajectories, Linear Differential Equations With Constant Coefficients And Other Miscellaneous Differential Equations.It Is Primarily Designed For B.Sc

And B.A. Courses, Elucidating All The Fundamental Concepts In A Manner That Leaves No Scope For Illusion Or Confusion. The Numerous High-Graded Solved Examples Provided In The Book Have Been Mainly Taken From The Authoritative Textbooks And Question Papers Of Various University And Competitive Examinations Which Will Facilitate Easy Understanding Of The Various Skills Necessary In Solving The Problems. In Addition, These Examples Will Acquaint The Readers With The Type Of Questions Usually Set At The Examinations. Furthermore, Practice Exercises Of Multiple Varieties Have Also Been Given, Believing That They Will Help In Quick Revision And In Gaining Confidence In The Understanding Of The Subject. Answers To These Questions Have Been Verified Thoroughly. It Is Hoped That A Thorough Study Of This Book Would Enable The Students Of Mathematics To Secure High Marks In The Examinations. Besides Students, The Teachers Of The Subject Would Also Find It Useful In Elucidating Concepts To The Students By Following A Number Of Possible Tracks Suggested In The Book.

One in seven people in England suffer from hearing loss of some kind, and the advent of digital hearing aids proved of great benefit to many patients. The Modernising Hearing Aid Services (MHAS) programme to improve audiology services, introduced in 2000, aimed to provide NHS patients with digital hearing

aids. But the demand from people upgrading from older models was not predicted, and this led to very long waiting lists and times. The Committee regards the Government's new framework for audiology, "Improving access to audiology services in England" (Dept of Health, March 2007, <http://www.18weeks.nhs.uk/public/default.aspx?main=true&load=ArticleViewer&ArticleId=570>) as primarily reiterating previous announcements. A main concern is that audiology is kept outside the 18-week referral to treatment target that applies to consultant-led services, which compounds the waiting time problem. There is a need to increase capacity, and the Department of Health should undertake an examination of the medium- and long-term demand for digital hearing aids. The Committee notes the variation in practice in NHS audiology departments, and believes many could operate more efficiently. They should examine the skill mix and levels of training or experience necessary, and look at more flexible approaches to service provision. The report also comments on the involvement of the private sector to provide additional capacity, and the entry into the market of others such as opticians. The private services need to be monitored and the quality of care assessed on the same basis as that used for the NHS.
