This is a reproducible activity book that introduces the 26 letters of the alphabet. The book is suitable for use with all age groups. It introduces each letter individually and provides practice activities in letter formation. This is done firstly by using shadow letters, and later in the lesson by allowing students to write the letters freehand. The book is amply illustrated, using pictures to move from letter and word recognition toward letter and word production. The alphabet will become familiar to users through matching exercises, close exercises, word tic-tac-toe puzzles, connect the dots illustrations, and more. A great place to begin!

An innovative examination of typography as a medium of communication rather than part of print or digital media.

Typography is everywhere and yet widely unnoticed. When we read type, we fail to see type. In this book, Kate Brideau considers typography not as part of "print media" or "digital media" but as a medium of communication itself, able to transcend the life and death of particular technologies. Examining the contradiction between typographic form (often overlooked) and function (often overpowering), Brideau argues that typography is made up not of letters but of shapes, and that shape is existentially and technologically central to the typographic medium. After considering what constitutes typographic form, Brideau turns to typographic function and how it relates to form. Examining typography's role in both the neurological and psychological aspects of reading, she argues that typography's functions exceed reading; typographic forms communicate, but that communication is not limited to the content they carry. To understand to what extent the design and operations of the typographic medium affect the way we perceive information, Brideau warns, we must understand the medium's own operational logic, embodied in the full diversity of typographic forms. Brideau discusses a range of topics--from intellectual property protection for typefaces to Renaissance and Enlightenment ideal letterforms--and draws on a wide variety of theoretical work, including phenomenological ideas about comprehension, German media archaeology, and the media and communication theories of Vilém Flusser and others. Hand-drawn illustrations of typographic forms accompany the text.
